DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 and 9-15 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-7, and 9-15 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claim 1, "a color space converter that receives the resizer data and converts the resizer data into converted data described in a second color space using a clock frequency of f/n , where n is an integer; and a display unit interface that receives the converted data from the color space converter and that outputs display data described in the second color space to the display unit using a clock frequency of Nf , where N is an integer". In claims 9 and 15, "converting the resized color data from the first color space to a second color space and outputting converted color data using a clock frequency of f/n , where n is an integer; and receiving the converted color data and outputting color display data to the display unit using a clock frequency of Nf , where N is an integer". The prior art of record however singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
